

Springfield, VA

Fast Facts

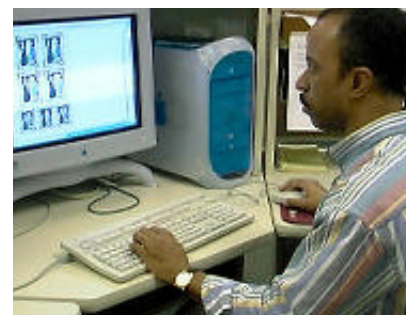

Located just eight miles south of Washington, DC, Gannett Offset/Springfield is the largest, most prestigious non-heatset print/production facility in the Mid-Atlantic Region. It is the leading publication printer in the DC metro area and has the distinction of being "The Birthplace of USA TODAY". The Springfield facility became the first printer of "The Nation's Newspaper on September 15, 1982 and today it produces more copies of the publication than any other printer in the world. With seven presslines, Springfield Offset prints, packages and distributes some of the finest four-color non-heatset publications in the nation.

We're specialists in getting your product ready for the press

Now offering direct-to-plate capabilities, our pre-press department provides the most comprehensive array of services of any print/production facility in the Mid-Atlantic. This includes support for both Macintosh and PC platforms as well as highend scanning and digital output services. From pasteup boards, film, floppy disk or FTP Internet transfer, the facility supports all media. Traditional camera and stripping services are also available.

Seven non-heatset presses offer solutions for big and small

Our seven non-heatset presslines offer extreme flexibility for any type of job. From tiny tabloids to ultra-large broadsheet formats with four-color throughout, Gannett Offset/Springfield has the press to meet your needs. Our customers' pressruns range from a few thousand to more than one million copies. Two of our presses are equipped with on-line glue and trim capabilities which provide a cost-effective solution for flexi or mini-tabs. Our giant Goss Colorliner press can produce 128 tabloid pages of four-color in a single signature.

Ultra-modern distribution center moves products.....faster

With the completion of our \$11.5 million distribution center renovation project, our four-Heidelberg 2299 inserters are now on-line with our presses giving us "direct to pocket" efficiencies. This means we can get the products out the door much faster. The Heidelberg also allow us to package 17 inserts into a single copy at press speed. We also offer inkjet addressing as well as standard Cheshire labeling, plus automated polybagging and specialized packaging.
